

FALCON OIL & GAS LTD.
("Falcon" or the "Company" or the "Group")

Interim results for the six months ended 30 June 2015

27 August 2015 - Falcon Oil & Gas Ltd. (TSXV: FO, AIM: FOG, ESM: FAC) is pleased to announce its financial results for the three and six months ended 30 June 2015.

The following should be read in conjunction with the complete Interim Financial Statements and the accompanying Management's Discussion and Analysis for the three and six months period ended 30 June 2015 filed with the TSX Venture Exchange. These filings are available at www.sedar.com and on Falcon's website at www.falconoilandgas.com.

Highlights:

Operational

- Commencement of the Australian nine well exploration and appraisal programme, planned from 2015 to 2018, with the spudding of Kalala S-1 on 14 July 2015.
- Processing of Falcon's exploration license application in South Africa's Karoo Basin continues to progress and the South African Department of Mineral Resources ("DMR") is expected to issue licences in 2015.

Financial highlights

- Strong financial position, debt free with cash of US\$10.5 million.
- Continued focus on strict cost management and efficient operation of the portfolio.
- G&A expenses decreased 44% period on period in the six months ended 30 June 2015 to US\$1.3 million (2014: US\$2.2 million).

Philip O'Quigley, CEO of Falcon Oil & Gas commented:

"It has been an exciting first half of 2015 for the Company with the commencement of our fully funded 2015 three well drilling programme; part of our Australian nine well drilling programme in the Beetaloo basin, with the spudding of our first well, Kalala S-1. Operations are ongoing and we should be in a position to update the market shortly.

Additionally in South Africa, we continue to make steady progress and expect the DMR to issue the Company with an exploration licence before the end of this year.

In this low oil price environment Falcon continues to be differentiated by its strong cash position, strict cost management, a funded drilling programme and high quality assets; thus Falcon is well placed to deliver shareholder value."

Australia – Commencement of initial 2015 three well fully-funded drilling and evaluation programme

On 15 July 2015, the Group announced the spudding of the Kalala S-1 well in the Beetaloo Basin, Australia. Kalala S-1 is the first of Falcon's fully funded and uncapped, 2015 three well drilling and evaluation programme targeting the Middle Velkerri formation to assess hydrocarbon saturation and

reservoir quality in the Beetaloo Basin. The 2015 three well programme is the commencement of a nine well exploration and appraisal programme planned from 2015 to 2018.

Kalala S-1 is located within exploration permit 98, with access from the existing Carpentaria Highway, and will be drilled to a total depth of approximately 2,800 meters. Rig 185, an ATS 400, from Saxon Energy Services Australia Pty. Ltd, a Schlumberger company, has commenced drilling which was estimated to take approximately 35 to 50 days. Kalala S-1 will be operated by Origin Resources Limited (“**Origin**”) (35%) with partners Sasol Petroleum Australia Limited (“**Sasol**”) (35%) and Falcon (30%).

Falcon is fully carried for all 2015 drilling and evaluation costs, retaining its 30% interest in 4.6 million gross acres of the Beetaloo Basin with co-venture partners Origin and Sasol.

The principal objectives of the 2015 three well drilling programme are to:

- penetrate the Middle Velkerri formation to assess hydrocarbon saturation and reservoir quality;
- evaluate oil versus gas maturity and determine the most prospective areas and depth window;
- provide further information on the aerial distribution of the target Middle Velkerri formation; and
- collect data points for subsequent vertical/horizontal drilling, completion and production testing.

Formation evaluation and reservoir characterisation will be carried out from these initial three wells through petrophysical interpretation, core analysis, geomechanical studies and stimulation design.

South Africa – processing of the exploration licence by the Petroleum Agency of South Africa (“PASA”) continues to progress

The PASA continues to progress the Company’s application for a shale gas exploration licence in South Africa’s Karoo Basin. The Company expects that the DMR will issue Falcon with a licence to explore for shale gas before the end of 2015.

Background

Falcon was granted a Technical Cooperation Permit in 2009 covering 7.5 million (30,327 km²) acres in the southern part of the Karoo Basin. The Company has a cooperation agreement (as announced on 12 December 2012) with Chevron Business Development South Africa Limited (“**Chevron**”), which enables the Group to work with Chevron for a period of five years in jointly obtaining exploration licences.

Hungary – review of operations

Falcon continues to review its operation and future plans in Hungary, evaluating all options available to the Group to deliver shareholder value. The Group maintains its 100% interest in the Máko Trough.

Financial review

Falcon’s cash and cash deposits balance as at 30 June 2015 was US\$10.5 million (31 March 2015: US\$11.5 million).

Falcon incurred a loss of US\$1.6 million during the six months ended 30 June 2015, decreasing from a loss of US\$2.4 million during the six months ended 30 June 2014. General and Administrative expenses decreased 44% in the six months ended 30 June 2015 to US\$1.3 million (2014: US\$2.2 million). The decrease reflects a continued focus on strict cost management and efficient operation of the portfolio.
